The Santa Barbara Independent says, in regard to saving split apricot trees: As is well known, much trouble has been experienced by growers of apricots through the fact that after trees have matured and as soon as weighted down by a full load of fruit, the trunks of the trees will frequently split down to the ground, and the tree, together with the time, labor and fruit, are a total loss. An orehardist of this city, who found several of his best trees dying out, hit upon a locky expedient, which will prob. upon a lacky expedient, which will probably prevent all further loss of this kind both to himself and neighbors. As an experiment he took one of the trees up, and binding it up temporarily, ran a bolt through the two parts and brought them up tight together. The tree immediately put forth new life, and not only grew into one again, but has grown over the bolt entirely, so that the iron keeps it firm and prevents it from falling under the weight of the heaviest yield, is completely hid from sight.

The San Diego Union gives some very encouraging information in regard to the mines at Ivanpah, in San Bernardino county. The silver mines are not large, but the ore is very rich, and two mills have been working the ore with good results. There are also gold and copper veins, and a very promising lead mine.

Robin Hood, says the Augusta Chronicle, never robbed the poor, but when he got a rich man in his power he plucked him well. The bold archer cried "Stand." His modern disciples say, "Be it enacted.

DE. RUSH'S MEDICAL ASSOCIATION:

GENTLEMEN.—I have been troubled with rheumatism for two years. I tried all the best advertised oils and liniments, and many first-class physicians without relief. The last dector I visited recommended Da. Horsi's "Blood Root Oil." I purchased a large bottle for fifty cents, and applied it. In two hours I was relieved and now I am entirely well. Its effects are wonderful and I believe it the only thing in the world which will cure rheumatism.

There are many men who die of this difficulty, ignorant of the cause, which is the second stage of seminal weakness.
